

## Student assistant FabLab

Are you a student at Saxion? Then we are looking for you! As of January 2024, we are looking for new assistants who would like to master all the tricks of the digital machines in the FabLab!

Would you like to?

- Work on various small and large (customer) projects, under the guidance of experts who can make (almost) anything;
- Experiment and become an expert in, the use of 'Digital Manufacturing techniques', such as 3D printing, laser cutting, CNC milling, electronics and more;
- Grow during your work, from participating in projects to being in charge yourself.
- Show your talents and projects during events, guided tours and/or workshops aimed at making people enthusiastic about the possibilities of Saxion FabLab;
- Seize the opportunity to (further) develop your talents and show them in a creative, multidisciplinary Make-environment;

Are you?

- The (prospective) professional who likes to tackle things, likes to show visitors the way and likes to work from A to Z on fun and challenging projects;
- A teamplayer who likes to learn from, and share knowledge with others;
- Skilled in 2D and / or 3D drawing packages (preferably Solidworks and Adobe Illustrator);
- Student at Saxion or at University of Twente;
- Available from Januari 2024;

Then we offer you:

- A challenging, educational position within our multidisciplinary team;
- The possibility to carry out assignments for visitors with additional use of knowledge and research facilities. In this way, a concrete contribution is made to increase innovative possibilities;
- A creative workplace where you can develop yourself and your talents through small and large design and research assignments. This acquired knowledge looks good on your resume;
- The chance to experiment with machines and materials, pushing the boundaries of both the technology and your own skills;
- The chance to help FabLab users to concretize their ideas and to think along with them, design and draw;
- The opportunity to participate in courses for free;

### About Saxion FabLab Enschede

[Saxion FabLab Enschede](#) is a high-tech public workspace where everyone has the opportunity to realize his or her idea themselves using modern digital means of production. Everyone can use the workspace. We are open for companies, students, product developers, young entrepreneurs, artists and individuals: all concepts can literally be made tangible!

Saxion FabLab practices open innovation. In our public digital workspace, everyone is challenged to make things themselves by means of various computer-controlled prototyping machines. Sharing of designs and ideas is encouraged. The focus is mainly on “do it yourself”. We will help and support you through walk-in consultation hours, workshops or specific courses for the realization of your project.

## Team

We have an incredibly enthusiastic team of different educational levels and backgrounds that can assist you in developing your idea. They can support you or give you tips during the open walk-in. Our Fablab team consists of 5 people you deal with on a daily basis. The Fablab assistants team consists of 8 students.

We are also part of the Industrial Design lectorate, which consists of 12 people, with whom we regularly collaborate.
